Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 27 – 39 are pending in this Office action.
2. With respect to Applicants' amendment, Examiner has withdrawn claim objection, rejection under 35 U.S.C. 112, second paragraph and rejection under 35 U.S.C. 101.
3. Applicants' amendment changes the scope of the claimed invention and therefore, there is a restriction.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 27 – 31, drawn to a method for transmitting messages over a communication network, classified in class 707, subclass 10.
 - II. Claims 32 – 36, drawn to formatting system for managing network data message, classified in class 707, subclass 203.
 - III. Claims 37 – 39, drawn to language interpreter for network databases, classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions as listed in Group I, Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of these three groups has separate utility such as follow.

Group I teaches a method for transmitting messages over a communication network, Group II teaches a formatting system (or version system) for managing network data message and while Group III teaches a language interpreter for network databases in an environment that implements a managing center and a plurality of distributed user terminal databases.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2162

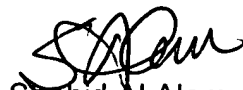

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
